

Power-tilt

QUICK HITCH

PLOW HITCH

An efficient technology

- **Complete in-cab operation**
Allows a single operator to hook up a one-way plow without leaving the truck cab.
- **Easy truck engine access**
The entire hitch can be tilted forward with the front wing post using the plow lift cylinder.

MODELS

L1901

Male coupler for front plow only

L1910

Male coupler for front plow and wing plow (includes horizontal front wing post supports)

L1902

Female adaptor designed to fit all LAROCHELLE front plows (Required to complete male couplers models L1901 or L1910)

SPECIFICATIONS

The male couplers L1901 and L1910 are provided with large greasable roller bushings to reduce wear and ease coupling with L1902 female adaptor.

The male couplers L1901 and L1910 are mounted on heavy duty 5/8" thick push plates.

The female adaptor L1902 is provided with urethane bumpers for a smoother, safer and easier coupling.

OPTION

Nitrogen suspension system model LSS-100 designed to absorb the shock loads occurring when the front plow is in the carry position

LAROCHELLE
